EDUCATION

Ontario Tech University

Oshawa, ON

Masters of Science in Computer Science

May 2024 – Present

- Member of VcLab under Professor Faisal Z. Qureshi, a leading researcher in the field of computer vision
- Finished 2nd place in defense-tech hackathon 2025
- Finished 1st in UOtaHack8 for the SurveyMonkey sponsor challenge

Ontario Tech University

Oshawa, ON

Bachelors of Science in Computer Science, Minor in Mathematics

Sept. 2019 – Dec. 2023

- President's List (2×): Awarded for earning a GPA of 3.8+
- Dean's List (3×): Recognized for achieving a GPA of 3.5+
- Gained early exposure to research through upper-year computer vision and AI projects.

EXPERIENCE

Teaching Assistant

May 2024 – Present

Ontario Tech University

Oshawa, ON

- Trusted as the lone TA for 3 challenging upper-year courses: Computational Photography, Computer Vision, and Computer Graphics
- Led weekly lab sessions, guiding students through programming concepts, assignments, and hands-on exercises
- Filled in for lectures and delivered instructional content when the course instructor was unavailable
- Helped design and update lab exercises to align with course curriculum and modern industry frameworks

Software Developer

May 2022 – Aug. 2023

NetProfitXL

Toronto, ON

- Developed back-end features in Python and SQL for ERP systems, customizing modules for client workflows
- Built front-end interfaces with HTML, JavaScript, Jinja, and Zebra for documents, fillable forms, and webpages
- Worked directly with clients on-site to determine system requirements and deploy software

Robot Pilot – Co-Op

Sept. 2019 – Dec. 2019

Kindred Systems

Toronto, ON

- Operated and supervised autonomous robotic systems, resolving real-time perception and manipulation failures
- Internal Python tools to streamline operator workflows, improving response speed & reducing repetitive manual tasks
- Logged and analyzed recurring failure cases, providing actionable insights to robotics and ML engineers
- Contributed to iterative testing in a production robotics startup with CI pipelines, version control, and agile development practices

PROJECTS

LDVAE-T | *Python, PyTorch, Hugging Face*

May 2024 – Dec. 2025

- Developed a Transformer-based Variational Autoencoder with a Dirichlet-constrained latent space for hyperspectral image unmixing
- Achieved better than state-of-the-art performance on benchmark datasets.
- Submitted to CVPR, pending peer review
- [arxiv preprint](#)

VCLab-ShazNet | *Git, Python, PyTorch, Javascript, HTML*

Nov. 2025

- Built a multi-class Transformer-based audio classification system for drone detection and identification.
- Achieved 2nd place in Defense-Tech Hackathon 2025 out of 140 applicants
- Reached a competition best 90% accuracy on real time classification, trained on 10 samples for 10 classes
- [Devpost Link](#)

TECHNICAL SKILLS

Languages: Java, Python, C/C++/C#, JavaScript, HTML/CSS, R, Flutter

Frameworks: React, Node.js, Flask

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, IntelliJ, Hugging Face

Libraries: PyTorch, TensorFlow, OpenCV, pandas, NumPy, Matplotlib
